

The morning of the 03.02.21, we went live with our second **Annual Disability and Activity Survey**. The survey was launched in 2019 to provide a greater understanding about disabled people's attitudes towards and involvement in sport and physical activity. Now, in its second year, the survey plays a crucial role. It helps to uncover the impact of the coronavirus (COVID-19) pandemic on disabled people's motivations and ability to be active.

We would really appreciate your support of this research report across your networks and own channels as well as helping to shape your own work.

Here's the link to the news story: [Research reveals pandemic's true impact on disabled people's activity](#).

If you would like a copy of the full press release, please email [laila@activityalliance.org.uk](mailto:laila@activityalliance.org.uk).

## Support us on social

Here are a couple of suggested tweets to promote the release of our Annual Survey. Please use the hashtag #ActivityAllianceSurvey:

- Research from @AllForActivity shows that twice as many disabled people felt that coronavirus greatly reduced their ability to do sport or activity compared to non-disabled people. Check out their new insight here: [www.activityalliance.org.uk/annual-survey](http://www.activityalliance.org.uk/annual-survey) #ActivityAllianceSurvey - **to use with social graphic one**
- New research from Activity Alliance's Annual Survey shows that disabled people are facing new and significant barriers to being active during the coronavirus pandemic. Read the report here: [www.activityalliance.org.uk/annual-survey](http://www.activityalliance.org.uk/annual-survey) #ActivityAllianceSurvey - **to use with social graphic two**
- New Disability and Activity Survey released today shows that coronavirus has made disabled people feel that they do not have the opportunity to be as active as they want to be. ## Annual Disability and Activity Survey 2020-21

---

**activity  
alliance**  
disability  
inclusion  
sport

The pandemic has presented disabled people with new barriers to being active:

- A fear of contracting COVID-19
- Impact on their health
- Lack of space and support to exercise at home
